

LaNeé Carter, Associate AIA
Architectural Associate

Experience

Ms. Carter has been working with Posen Architects since 2011 and has experience in all aspects of the design process, including preliminary design, architectural visualization, construction documentation, and construction administration. She successfully navigates the intricacies of FGI compliance in healthcare settings and the regulatory requirements of different jurisdictions in New Jersey and New York.

LaNeé is adept at integrating technology – including new architectural rendering techniques and Revit, a Building Information Modeling (BIM) software – into the design process. She also trains and mentors the technical staff to establish Revit as the software platform for the office.

Education

Philadelphia University
College of Architecture &
the Built Environment
Bachelor of Architecture, 2011
Philadelphia, PA

American University of Rome
Study Abroad Program, 2010
